EDUCATION

University of Waterloo, Bachelor of Computer Science (co-op) | **Average: 83%** Sept 2019 - May 2024
Coursework: User Interfaces, Object-Oriented Development, Distributed Systems, Database Management, Software Delivery

EXPERIENCE

The Breeders Showcase | *Founding Engineer* Jan 2026 – Present

- Introduced production monitoring and alerting for a Flutter + Laravel app by integrating Crashlytics and AWS CloudWatch, replacing user-reported complaints with automated issue detection and real-time alerts.
- Enabled the company's first paid acquisition channel by integrating Meta App Events across iOS (Swift) and Android (Kotlin) via native Platform Channels, delivering event-level ad attribution and audience targeting.

aSocial Inc. | *Founding Flutter Engineer* Apr 2024 – July 2025

- Spearheaded the end-to-end development, testing, and App Store launch of Lock In using Flutter, reaching the top-100 (#74) productivity apps and surpassing 10,000+ downloads.
- Led an offshore engineering team, conducting code reviews, enforcing best practices, and ensuring maintainable code.
- Architected and deployed a referral system using Flutter, Next.js, and Firebase, boosting user acquisition by 37%.
- Redesigned 40+ screens with responsive layouts, animations, and state management (Provider), replacing a clunky, hard-to-navigate UI with a polished and engaging experience.

DNASTack | *Software Engineer Intern* May 2023 – Aug 2023

- Improved editing and publishing data clusters' efficiency by engineering 5+ angular components for the publisher website.
- Created a dashboard interface for Azure Marketplace app for easy subscription management using ASP.NET and C#.
- Integrated tracing into DNASTack Client Library to identify software bottlenecks using Zipkin and Python.

Enlighted (Siemens) | *Frontend Developer Intern* Aug 2022 – Dec 2022

- Created a Slack bot for employee scheduling, adopted company-wide by 200+ employees, improving team coordination.
- Engineered an app's user flow enhancing team collaboration across 5+ internal teams with a point-based reward system.

HomeX | *Software Engineer Intern* Jan 2022 – Apr 2022

- Revamped the signup flow of the mobile app by implementing Flutter pages using the MVVM design pattern.
- Migrated to an external Stripe library to handle payments in the mobile app, eliminating 5+ hrs/week of manual work.
- Developed a modular Flutter web widget for seamless access to product features and services via 15+ partner websites.

Bentley Systems | *Software Engineer Intern* May 2021 – Aug 2021

- Optimized the process for modifying links by visualizing data in a table using React and TypeScript saving 3+ hrs/week.
- Designed over 15 automated UI test cases using Selenium and C# to identify and resolve software problems.

PROJECTS

AgentPals | *Full Stack App (React + FastAPI + Supabase)*

- Built a web app for real estate agents to analyze property disclosure documents using Cohere and Qdrant vector database.
- Architected a real-time chat interface leveraging RAG and WebSockets, enabling users to interact with Cohere and query property details and associated documents.

Timeline | *Flutter + FastAPI + Celery*

- Designed and implemented a distributed task scheduling system using FastAPI, Celery, RabbitMQ, and Redis, enabling user-defined periodic workflows to run asynchronously with precise time-based triggers and automatic rescheduling.
- Built a 3-agent research pipeline using Claude API + Exa API to transform user queries into time-bounded web retrieval and source-cited summaries, persisting query analysis, results, and execution metadata to Firestore for each scheduled run.

TECHNICAL SKILLS

Languages: Go, PHP, JavaScript, TypeScript, Dart, Python, C/C++, C#, SQL

Technologies: Next.js, React, Flutter, Node, FastAPI, MySQL, Firebase, Supabase, Hadoop, Spark
