EDUCATION

University of Waterloo, Bachelor of Computer Science (co-op) | **Average: 83%** September 2019 - May 2024
Coursework: User Interfaces, Object-Oriented Development, Distributed Systems, Database Management, Software Delivery

EXPERIENCE

The Breeders Showcase | *Founding Engineer* January 2026 – Present

- Introduced the first production observability layer for a Flutter + Laravel app on AWS EC2, collecting 6+ backend log streams, host/process metrics, and CloudWatch dashboards/alarms to surface API and chat failures before user reports.
- Instrumented Laravel and Node.js Socket.IO services with structured API logs, request correlation, latency/error metrics, SNS alerts, and OpenTelemetry tracing, improving root-cause analysis across Apache, PHP-FPM, PM2, and Socket.IO.
- Enabled the company's first paid acquisition channel by integrating Meta App Events across iOS (Swift) and Android (Kotlin) via native Platform Channels, delivering event-level ad attribution and audience targeting.

aSocial Inc. | *Founding Flutter Engineer* April 2024 – July 2025

- Spearheaded the end-to-end development, testing, and App Store launch of Lock In using Flutter, reaching the top-100 (#74) productivity apps and surpassing 10,000+ downloads.
- Architected and deployed a referral system using Flutter, Next.js, and Firebase, boosting user acquisition by 37%.
- Rebuilt 40+ Flutter screens with responsive layouts, animations, and Provider state management, standardizing reusable UI patterns to deliver a cleaner, more intuitive user experience.

DNASTack | *Software Engineer Intern* May 2023 – August 2023

- Developed 5+ Angular components for a data publishing workflow, streamlining cluster editing and publishing for teams.
- Built an Azure Marketplace subscription dashboard using ASP.NET and C#, replacing manual management with a GUI.
- Integrated tracing into DNASTack's Client Library using Zipkin and Python, enabling performance bottleneck diagnosis.

Enlighted (Siemens) | *Frontend Developer Intern* August 2022 – December 2022

- Created a Slack bot for office scheduling, adopted by 200+ employees, replacing manual check-ins with instant visibility.

HomeX | *Software Engineer Intern* January 2022 – April 2022

- Revamped the mobile app's login flow in Flutter and added SSO, delivering faster and simpler authentication experience.
- Replaced an internal payment library with Stripe in the Flutter app, eliminating 5+ hrs/week of developer maintenance.
- Developed a configurable Flutter web widget adopted by 15+ partner websites, enabling users to book services directly.

Bentley Systems | *Software Engineer Intern* May 2021 – August 2021

- Streamlined data modification by replacing raw JSON with an interactive React + TypeScript table, cutting 3+ hrs/week.
- Implemented 15+ automated UI tests using Selenium and C#, covering 5 core user flows and eliminating manual testing.

PROJECTS

Timeline | *Flutter + FastAPI + Celery*

- Designed and implemented a distributed task scheduling system using FastAPI, Celery, RabbitMQ, and Redis, enabling users to schedule recurring workflows with automatic execution and rescheduling.
- Built a 3-agent research pipeline using Claude API and Exa API that transforms user queries into source-cited summaries, with results displayed on a timeline for tracking changes over time.

AgentPals | *Full Stack App (React + FastAPI + Supabase)*

- Built a web app for real estate agents to analyze property disclosure documents using Cohere and Qdrant vector database.
- Implemented a real-time RAG chat interface using WebSockets, enabling users to query across all uploaded documents and get source-cited answers instantly.

TECHNICAL SKILLS

Languages: Go, PHP, JavaScript, TypeScript, Dart, Python, C/C++, C#, SQL

Technologies: Next.js, React, Flutter, Node, FastAPI, AWS, Google Cloud, MySQL, Firebase, Hadoop, Spark
